

## FACTSHEET – 2020

Ecoscience has developed a very original concept which combines a Luxury Lodge with a Science Center where researchers of various fields can meet and work on their specific projects.

Our guests can choose to sleep either in the Lodge section or in the Tents (upon availability) and they can interact with the researchers present on the site when they visit us.

Our Director, Dr. Ben Beeckmans, a volcanologist, is working on the development and setting of seismic stations in order to provide data on the activity of Mt Meru and to develop a proper safety plan for the city of Arusha. When Dr. Beeckmans is present, he can share his wide knowledge of the region with your travellers.

### Luxury Boutique Lodge Rooms

- 6 en-suite bedrooms with king size beds  
An extra single bed is possible
- 2 rooms are accessible for disabled guests
